

ALRAHJE PAUTE

Registered Electronics Engineer (RECE)

OBJECTIVES

Registered Electronics Engineer with hands-on experience in electronic systems, communications fundamentals, and systems integration, complemented by developing and deploying production-ready applications such as inventory and sales tracking systems, an Android POS application, and an ongoing document tracking system.

SELECTED PROJECTS

SMART CLEANING ROBOT (ARDUINO-BASED)

Arduino Uno, HC-06 Bluetooth Module, Embedded C/C++

- Designed and built a mobile smart cleaning robot capable of autonomous movement and remote control via a mobile device using Bluetooth (HC-06), integrating motor control, wireless communication, and embedded system logic using Arduino Uno.

INVENTORY AND SALES TRACKER WEB APPLICATION

Flask, Python, PostgreSQL, HTML, CSS, JS (2025)

Deployed live at <https://inventory-app-mwp6.onrender.com/>

- Built and deployed a production-ready web application with authentication, sales tracking, and automated reports.
- Designed a PostgreSQL database and implemented CRUD and reporting queries on a cloud-deployed system.

ANDROID POINT-OF-SALE APPLICATION

Kotlin, Android SDK, Room (SQLite)

- Developed an Android POS application with core features such as cart management, checkout processing, local transaction storage, and incremental invoice tracking, designed for offline-capable retail operations.
- Designed a POS-optimized user interface and system architecture intended to support inventory management and peripheral integration (e.g., Bluetooth devices).

EXPERIENCE

TECHNICAL PROGRAMMER / SYSTEMS INSTALLER

Converge IT Solutions, INC. (2023)

- Programmed, configured, and troubleshoot integrated hardware-software systems, including automation, networking, and CCTV deployments.

CERTIFICATIONS

- **Registered Electronics Engineer**, PRC - Philippines
- **Junior IECEP Club Officer**, Institute of Electronics Engineers of the Philippines
- **CS50x: Introduction to Computer Science**, Harvard University (edX)

EDUCATION

BS ELECTRONICS ENGINEERING

University of the Philippines
Diliman 2016-2020

Notre Dame of Marbel University
2022-2024

SKILLS

ELECTRONICS AND CNS- RELEVANT SKILLS

- Fundamentals of analog and digital communications
- Basic RF and signal transmission concepts
- Electronic circuits and power system basics
- System reliability, redundancy, and fault isolation
- Preventive maintenance and troubleshooting
- Systems integration and testing

TECHNICAL AND SYSTEMS SUPPORT SKILLS

- Embedded systems and microcontroller projects (C/C++)
- Wireless communication basics (e.g., Bluetooth)
- Software-assisted system monitoring
- Database fundamentals for operational systems
- Version control (Git)
